Cold							

No Impacts

Minimal Impacts

Moderate Impacts

Severe Impacts

WEATHER KEY POINTS

04/18/22 - 04/24/22

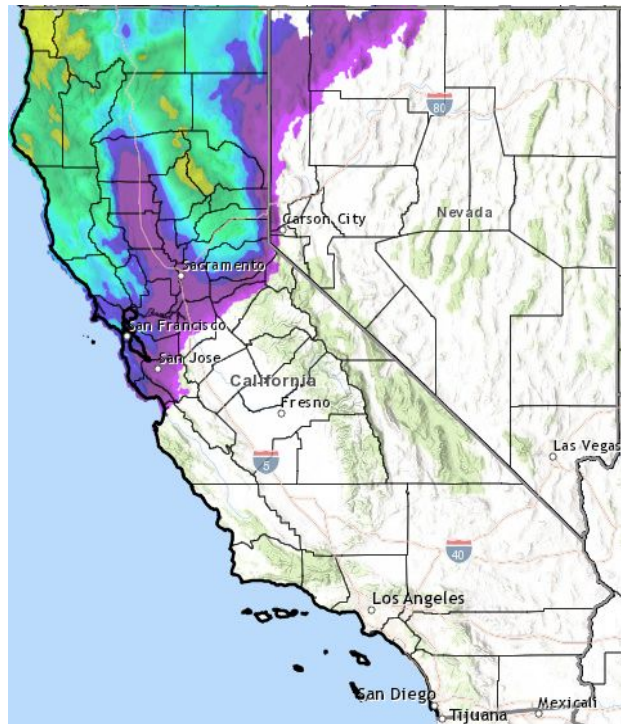

Monday - Sunday

- The next storm system will push across the state Monday and Tuesday
 - Precipitation will focus on northern California, with valley rain and some light to locally moderate snow possible above 3000-5000 feet
 - Gusty winds are expected across much of the state, with gusts to 50 mph in the higher terrain, along the Oregon border, and across the southern desert areas
 - Gusty Sundowner winds across Santa Barbara County are also expected, strongest Monday night
- The series of storms will continue mid-to-late week, with additional periods of precipitation expected Wednesday morning through Thursday night
 - Precipitation could be more significant and more widespread with this storm, spreading into central and potentially southern California
 - Travel impacts due to accumulating snow will once again develop above 3000-5000 feet, especially in the northern and central mountains, with multiple feet of snowfall possible in the Sierra
 - Isolated to scattered thunderstorms may be possible, especially Thursday
 - Additional gusty winds are also expected through Friday, especially in the mountains and across southern California
- Some showers will likely linger into Friday, especially in the mountains, but in general a drying trend is currently expected Friday into the weekend

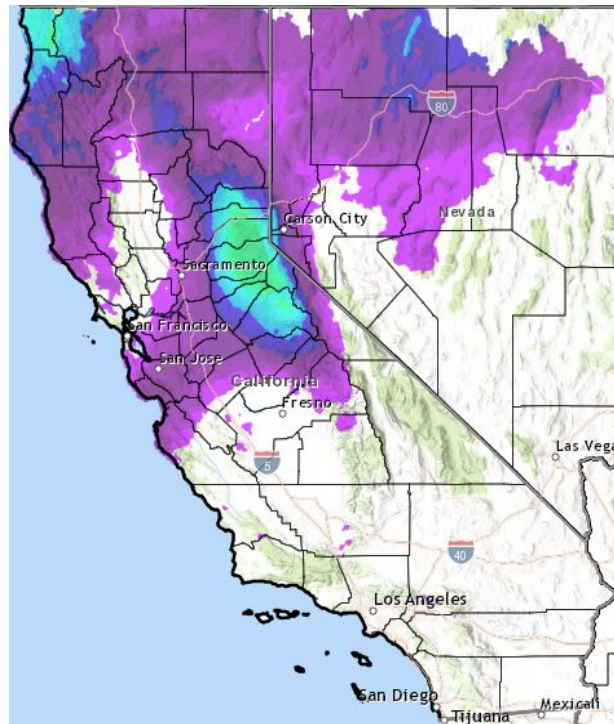

PRECIPITATION FORECAST

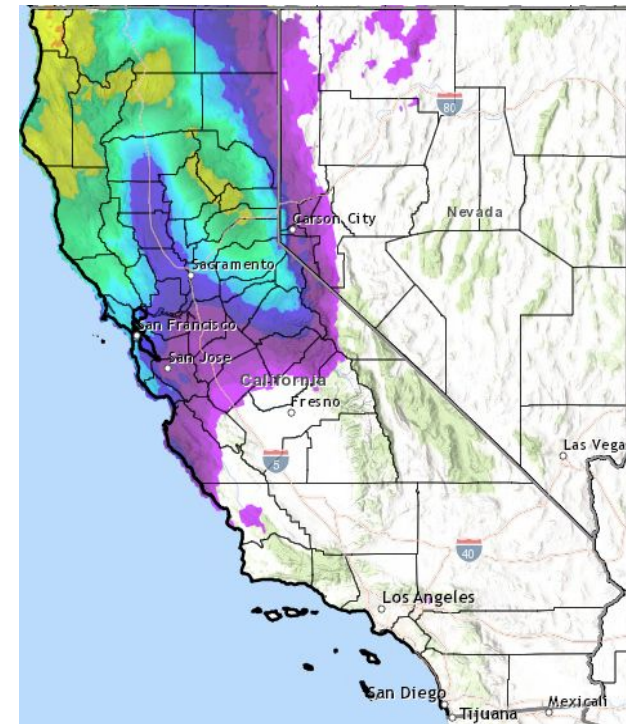

04/18/22 - 04/20/22

Monday

Tuesday

Wednesday

Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

Precipitation (inches)

WEATHER OUTLOOK

04/23/22 - 05/01/22

6-10 Day Outlook (April 23 - April 27)

Temperatures

- Below normal temperatures are favored across far northern California, with above normal temperatures favored for southern California

Precipitation

- Below normal precipitation is favored for much of the state

8-14 Day Outlook (April 25 – May 1)

Temperatures

- Below normal temperatures are slightly favored for far northern California, with above normal temperatures favored for the southern half of CA

Precipitation

- Below normal precipitation is favored for much of the state
